Más información

Accesibilidad

Es el grado en el que todas las personas pueden utilizar un objeto, visitar un lugar o acceder a un servicio, independiente de sus capacidades físicas, cognitivas y técnicas.

Relacionado a Internet se refiere a qué tan apto se encuentra el contenido de un sitio para ser interpretado por todos los usuarios, independientemente de sus limitaciones fisiológicas y tecnológicas.

Usabilidad

Facilidad con que las personas pueden utilizar una herramienta u objeto fabricado por otras personas con el fin de alcanzar un objetivo en concreto.

En el diseño Web, se refiere exclusivamente a que tan beneficiosa es la experiencia de uso de una interfaz gráfica interactiva.

“Si les hubiera preguntado a mis clientes lo que querían para transportarse, me habrían dicho:
un caballo más rápido”

Henry Ford

Graceful Degradation

La degradación elegante es la propiedad que habilita a un sistema a seguir funcionando luego de haber ocurrido un error.

El decrecimiento del sistema es proporcional a la gravedad del error.

Esta no es una propiedad exclusiva de las máquinas sino también aplicada a las interfaces de usuarios y su capacidad para tolerar los errores.

Javascript no obstructivo

Formato y navegación móvil para templates comunes

Contenido en ventanas modales para móviles

Progressive Enhancement

La mejora progresiva es una estrategia del diseño web que hace hincapié en la accesibilidad de los sitios web, su semántica HTML/CSS y las tecnologías de secuencias de comandos.

El objetivo es ir mejorando el aspecto y la funcionalidad de acuerdo a las capacidades de los nuevos navegadores.

ABOUT MATT

Matt Porterfield is a 3D user interface and design expert with an extensive portfolio in design, motion and production in both live and recorded theater programs at some notable venues.

INTRODUCTION

He was Apple's first user interface and immediately defined Matt's ability to explore and innovate, but gradually, across the hundreds of years of the discipline, the work expands the boundaries and scope of being human and challenges us, the viewers, to expand both. The more time, I spend on the stage, the more I get to know the human mind and the more I get to know the human mind. The more I get to know the human mind, the more I get to know the human mind. The more I get to know the human mind, the more I get to know the human mind.

"I'm a tactile learner, so it wasn't until I got my hands on the tools that it became actualized for me. I thought, 'I really like this,' but it wasn't until later that I realized it had the potential to combine all the things that interested me."

Modernizr is a JavaScript library that detects HTML5 and CSS3 features in the user's browser.

Why use Modernizr?

Taking advantage of cool new web technologies is great fun, until you have to support browsers that lag behind. Modernizr makes it easy for you to write conditional *JavaScript and CSS* to handle each situation, whether a browser supports a feature or not. It's perfect for doing progressive enhancement easily.

How it works

Modernizr runs quickly on page load to detect features; it then creates a JavaScript object with the results, and adds classes to the `html` element for you to key your CSS on. Modernizr supports dozens of tests, and optionally includes [YepNope.js](#) for conditional loading of external `.js` and `.css` resources.

Check out the [full list of features](#) that Modernizr detects, or learn more about [conditional resource loading with Modernizr](#).

“An indispensable tool.”

— Bruce Bowman, *Adobe BrowserLab Product Manager*

Download Modernizr 2.6.2

Use the commented, uncompressed Development version to develop with and learn from.

[View documentation](#)

Then, dive into the Production build tool and pick just the tests you need!

Get started with Modernizr

While Modernizr gives you finer control over the experience through JavaScript-driven feature detection, it is important to continue to use best practices throughout your development process. Use progressive enhancement wherever you can, and don't sacrifice accessibility for convenience or performance.

Spoofs & Mimics User-Agent strings.

Ever needed to quickly switch between user-agent strings on the fly? Developing a site that needs to work on both mobile browsers and desktop browsers? Sick of some archaic site blocking you because you're not using Netscape 4?

The User-Agent Switcher for Chrome is the answer. With this extension, you can quickly and easily switch between user-agent strings. Also, you can set up specific URLs that you want to spoof every time.

This version is new and improved, and not only modifies the user-agent sent with the HTTP requests, but also the javascript objects in the page.

NOTE: if Google sites / YouTube have problems after using a mobile user-agent, you may need to switch the user-agent back to Chrome *and* clear your cookies for the sites to treat the browser normally again.

New to Ripple? Hit up the [Main Documentation](#) to get started.

About

Apache Ripple™ is a web based mobile environment simulator designed to enable rapid development of mobile web application frameworks, such as [Apache Cordova™](#) and [BlackBerry® WebWorks™](#). It can be paired with current web based mobile development tools to save time spent developing and testing on real devices and/or simulators.

It is free software, licensed under the [Apache License, Version 2.0](#).

Download

Until official downloads are available, you will need to configure and build targets before you can install them. Please follow [README.md](#) for that process.

Documentation

Until a Wiki is created (see Infra issue [here](#)) and content is added, there are two places to look for documentation:

1. [The Projects `doc` Folder](#)

Contribute

Any involvement in the project is *always* welcome, *and* encouraged.

Diseño web adaptativo es la capacidad que tiene un sitio web para ser visualizado correctamente independientemente del dispositivo desde donde se accede. No se trata exclusivamente de reacomodar la información sino de presentar el contenido de manera óptima para el usuario.

Accesibilidad

Es el grado en el que todas las personas pueden utilizar un objeto, visitar un lugar o acceder a un servicio, independiente de sus capacidades físicas, cognitivas y técnicas.

Relacionado a Internet se refiere a qué tan apto se encuentra el contenido de un sitio para ser interpretado por todos los usuarios, independientemente de sus limitaciones fisiológicas y tecnológicas.

Usabilidad

Facilidad con que las personas pueden utilizar una herramienta u objeto fabricado por otras personas
